

Jesse Martinez

Software Developer

Prior United States Marine who found a passion in technology. I started pursuing programming in free courses online which eventually landed me in a coding boot camp that turned me into a Software Developer. My past military experience aided me throughout my past jobs with attention to detail, leadership experience, initiative to work, and the ability to always push forward for new knowledge.

Education

2017-01 - Current	Some College (No Degree): Computer Science And Programming <i>Houston Community College - Houston, TX</i> <ul style="list-style-type: none">Continuing education in Computer Science
2011-01 - 2015-01	High School Degree <i>Alief Taylor High School - Houston, Texas</i>

Programming Projects

MeetMeHalfway - <https://github.com/JesseMart/API-Project.git>

- **Uses Google Maps API, HTML, CSS, BootStrap, JavaScript**
- Allows users in the Houston area to meet halfway between both of their addresses. It's measured by driving time, and returns local restaurant around the halfway mark in a certain radius.
- **Uses the Zomato API**
- The **Zomato API** connects to the **Google Maps API** and creates an algorithm to find the nearby restaurants within the set radius
- Hosted one a live **AWS S3** web server.
- This project was completed with 3 other developers.

Favorite Music Artist Website - <https://github.com/JesseMart/musicApp.git>

- Website including information, current album and songs info for the artist "The Weeknd"
- Includes an active feedback page.
- Uses **Node.js**, **Javascript.js** and **JSON** data.

BlackjackGame - https://github.com/JesseMart/blackjack_game.git

- Uses **JavaScript**, **HTML 5** and **CSS 3**
- Uses multiple functions calls to create the cards, deal the cards, shuffle the cards, etc.

RPG Game - <https://github.com/JesseMart/rpg-hero.git>

- My very first project where a Hero (You) fights an random enemy
- The user has an option to choose whether or not to fight the enemy
- Uses primarily **Python**
- Uses only **Python**
